The 77 Chair

Inspired by his American colleagues, Finn Juhl designed a new series of furniture in 1953 with a streamlined and more industrial aesthetic. Among these was the 77 Chair, whose upholstered body appears to be floating on the delicate, almost invisible frame made from burnished steel. The armchair is manufactured in Denmark on a solid blind frame in beech, upholstered and hand-stitched according to traditional craftsmanship. Both the fixed seat and the loose back cushion are with spring inserts, ensuring both comfort and durability. The 77 Chair is available in textile or leather, with burnished steel legs and wooden toes in oak or walnut.
